

Myat Kaung Khant

Full Stack Developer | Junior & Freelance

East London, UK | myatkaungkhant022@gmail.com | +44 777 441 4594 | [Portfolio](#) | github.com/mkkbun

PROFESSIONAL PROFILE

BSc-qualified Full Stack Developer based in East London with experience delivering real-world client projects from concept to production. Proficient across the modern TypeScript/JavaScript stack — React 18, Next.js 14, Node.js, PostgreSQL, Docker, and AWS — with practical exposure gained through a UK internship and remote contract work. Combines technical depth with AI tooling fluency (Claude, Gemini, Cursor) to ship high-quality software efficiently. Seeking a junior or freelance full-stack role where clean architecture and real impact matter.

TECHNICAL SKILLS

Languages: TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · SQL · XML

Frontend: React 18 · Next.js 14 · Redux Toolkit · React Query · Zustand · Tailwind CSS · Radix UI · Framer Motion · Vite

Backend: Node.js · Fastify · Express.js · REST APIs · GraphQL · JWT Auth · WebSockets (Socket.io) · Nodemailer

Databases: PostgreSQL · TimescaleDB · MongoDB · MySQL · Redis · Prisma ORM · T-SQL

Cloud & DevOps: AWS (EC2, S3, CloudFront) · Google Cloud Run · Docker · Nginx · GitHub Actions · CI/CD · Vercel · Railway

AI & Tooling: Claude API · ChatGPT · Gemini · Google AI Studio · Cursor · Multi-Tenant Architecture

EXPERIENCE

Freelance Full Stack Developer at Self-Employed

2025 – Present · Remote / East London

- Deliver end-to-end web applications for real-world clients — owning every layer from requirements and UI/UX through API design, database architecture, and cloud deployment.
- Build responsive, high-performance frontends with React 18 and Next.js 14, leveraging SSR and ISR to optimise Core Web Vitals and SEO for client sites.
- Design and implement RESTful and GraphQL APIs using Fastify and Express.js, secured with JWT authentication and role-based access control.
- Integrate WebSocket communication (Socket.io) for real-time features — live dashboards, push notifications, and collaborative data updates.
- Provision cloud infrastructure on AWS (EC2, S3, CloudFront) and Google Cloud Run; configure Nginx reverse proxies and automate deployments with GitHub Actions CI/CD pipelines.
- Manage relational and NoSQL databases — PostgreSQL with Prisma ORM, TimescaleDB for time-series workloads, MongoDB, and Redis for caching and rate limiting.
- Leverage AI developer tools (Claude API, Gemini, ChatGPT, Cursor) to accelerate feature delivery, code reviews, and AI-assisted content generation for clients.

Web Development Intern at Subfero, Bristol

Jun 2024 – Dec 2024 · Bristol, UK

- Supported the development team in building and maintaining client-facing web applications using React, TypeScript, and Node.js.
- Assisted in migrating a legacy JavaScript codebase to TypeScript, improving type safety and reducing runtime errors across key modules.
- Implemented responsive UI components using Tailwind CSS and Radix UI, following accessibility best practices and agency design guidelines.
- Contributed to REST API development with Express.js and integrated third-party services including payment gateways and email providers.
- Gained practical exposure to Git workflows, code reviews, agile ceremonies, and deploying applications to cloud environments.

Junior Full Stack Developer at Remote — Contract (Thailand)

Sep 2023 – May 2024 · Remote

- Joined a remote development team to build and maintain full-stack web features across React frontends and Node.js backend services.
- Developed new feature modules using React 18 and TypeScript, improving UI consistency and reducing component re-renders with memoisation and code-splitting.
- Implemented a GraphQL data layer to replace legacy REST endpoints, reducing average API response time by approximately 25%.
- Built a real-time notification system using Socket.io and Redis pub/sub, delivering sub-100 ms event propagation to connected clients.

- Wrote Docker Compose configurations for reproducible dev environments and contributed to migrating staging workloads to Google Cloud Run.
- Participated in agile sprints, pull request reviews, and maintained technical documentation in a fully distributed team.

SELECTED PROJECTS

Personal Developer Portfolio | *React 19 · TypeScript · Vite 6 · Tailwind CSS 4 · Framer Motion · Nodemailer · Vercel* myatkaungkhanthportfolio.vercel.app

- Built a glassmorphic single-page portfolio featuring animated typewriter roles, an interactive 3D canvas, custom cursor tracking, and 4 switchable accent themes — using React 19, TypeScript, and Vite 6.
- Engineered a working contact form backed by a Node.js/Nodemailer API sending emails via Gmail SMTP, deployable to Railway or Render with a single environment config.
- Fully responsive across desktop and mobile using Tailwind CSS 4 and Framer Motion; structured with TypeScript strict mode and clean component architecture.

Real-Time Analytics Dashboard | *React 18 · Fastify · TimescaleDB · Socket.io · Redis · Docker · Google Cloud Run*

- Built a live data dashboard ingesting time-series events into TimescaleDB and streaming aggregated metrics to React clients via Socket.io rooms.
- Reduced query latency by ~60% through TimescaleDB continuous aggregates and a Redis caching layer; deployed on Google Cloud Run with 99.9% uptime.

Multi-Tenant SaaS Platform | *Next.js · Express.js · PostgreSQL · Prisma · JWT Auth · AWS S3 · CloudFront*

- Architected a multi-tenant application with schema-based data isolation, JWT auth with refresh-token rotation, and AWS S3 + CloudFront for global media delivery.
- Integrated Claude and Gemini APIs to power AI-assisted content generation, reducing manual data-entry effort for end users by approximately 40%.

POS & Inventory Management System | *Next.js 14 · Node.js · PostgreSQL · Prisma · Tailwind CSS · Docker · GitHub Actions*

- Delivered a full-featured point-of-sale system for a retail client with multi-branch inventory and real-time stock sync via WebSockets.
- Deployed on AWS EC2 behind Nginx with automated blue/green deployments through a GitHub Actions CI/CD pipeline.

EDUCATION

BSc (Hons) Information Technology

2023 – 2024 · Bristol, UK

University of the West of England (UWE Bristol)

Relevant Modules: *Advanced Topics in Web Development · Cloud Computing · Database Design & Development · Networking · Security · Project Management*

Higher Diploma in Information Technology

2019 – 2021 · Myanmar

GUSTO University

Relevant Modules: *Programming · Data Security & Algorithms · Internet of Things · Managing a Successful Project · Networking · Cloud Computing*

ADDITIONAL

Availability: Open to junior full-time roles and freelance contracts · Remote or London-based · Immediate start

Interests: Open-source development · AI/LLM integrations · System design · Developer tooling
